

I am very upset to find out about this situation. Is the FCC being run by the Taliban? What happened to free speech and free competition? All of our jobs are moving over seas. Nearly everything I own says "Made in China" on it. This is a big problem. The fact that I can hear traffic and weather on my subscription satellite radio service causes no harm to anyone.

PS - I also enjoy listening to Howard Stern. I have a family, run two businesses and pay alot of taxes.

Please stop meddling in my personal life, Colin Powell Jr.

Tod Cagan
